

PE Global
TECHNICAL SPECIALISTS

Delivering the talent for your business

PE Global is a Global Resourcing Company that specialises in offering tailored solutions to our client's needs. We provide a cost effective, efficient and customised service for each individual client across a broad range of industries.

What sets PE Global apart is our thorough understanding of the technologies and technical manpower requirements of the Industries we work in. This knowledge and understanding is due to the quality and experience of our people. All of our consultants are graduates in Engineering or Scientific disciplines, many of whom have master's degrees and/or have worked in these industries for a number of years, setting us apart from our competition.

PE Global consists of two companies; PE International and PharmEng.

PE International's reputation is based on forming successful partnerships with our clients, providing them with innovative designs and cost effective solutions in the context of sound judgment, strong management and technical excellence.

PE International offers services across a range of key sectors including Oil and Gas, Construction, Civil Infrastructure, Mining and other related heavy Industries. Our key projects are based throughout the Middle East, Asia, Africa, Australasia and Europe.

PharmEng has been in operation since 2005 and we specialise in the Life Science and Healthcare Industries throughout Ireland, Europe and Asia. PharmEng offers contract and temporary contract services across a range of key Life Science sectors including Pharmaceutical and Biotechnology, Medical Technologies/Devices, and Healthcare Industries.

PE Global is a specialist technical recruitment organisation that provides a high quality recruitment service to a range of sectors and industries throughout the world.

PE Global specialise in the following Industries:

- ▶ Pharmaceutical/Biotech.
- ▶ Oil and Gas.
- ▶ Construction / Civil's and Infrastructure.
- ▶ Medical Devices.

PE Global offers a comprehensive range of services to our clients, across different sectors. We have the experience and track record to deliver these services outlined below to meet your project and resourcing needs.

PE Global offers the following Services:

- ▶ Contract and Permanent Resourcing.
- ▶ Managed Services.
- ▶ Retained Advertising.
- ▶ Retained Placement.
- ▶ Recruitment Campaign Management.

PharmEng has a proven track record working with clients across Ireland and Europe in the Pharmaceutical and Medical device sector.

The Pharmaceutical Industry is changing globally. In Europe it is moving from a primary manufacturing base to a centre for conducting higher value added operations such as manufacturing finished products, Biotechnology and Research & Development.

This change is being driven by a number of factors including:

- (1) The increasing costs of manufacture in Europe
Competition from generic manufacturers
Pressures globally to reduce the cost of products
PharmEng supplies highly technical and innovative people at competitive prices that larger Engineering firms cannot compete with.
- (2) In Asia, there is a major drive towards the establishment of Manufacturing sites in addition to a newer focus on Research & Development.

Major pharmaceutical companies have looked increasingly to countries such as China, India, and Singapore to outsource the development of innovative drugs to overcome the huge costs of bringing a drug to the market.

Asia, led by Japan and India, will also start developing a robust pipeline of novel drugs that address the needs of both Asia and the rest of the developed world such as the US and Europe. The various countries in Asia will undeniably face a multitude of challenges as they develop their industries. However, given their traditional resourcefulness and determination, it is beyond doubt that Asia's place within the global pharmaceutical industry over the next few decades will grow in rapid prominence.

We see continued growth in the Asian pharmaceutical sector and PharmEng's strong links in the Continent means we can find the right people to help drive the growth forward.

The medical device sector continues to be a strong growth sector both nationally and globally. This industry now covers a diverse range of products and services from disposable plastic and wound care products to precision metal implants including pacemakers to microelectronic devices, orthopaedic implants, diagnostics, contact lenses and stents.

Many of the world's top medical technology companies have invested significantly in Europe and a number of exciting, research-based, indigenous companies are emerging and competing internationally.

The medical technology industry in Europe is changing from being prominently manufacturing to being more complex and driven by R&D.

PharmEng has extensive experience providing expertise within the medical device field.

We can provide candidates across all areas of the industry, from R&D and Design, through Process and Manufacturing to final Validation and Quality. Our ability to source the highest quality candidates ensures that all needs can be met, from short term contracts to long term or staff positions

PE Global has many years of experience of supplying contract and permanent recruitment services to the Oil & Gas industry worldwide.

Our active database of international oil & gas personnel is over 100,000 strong, bolstered by our International databases developed over many years. PE Global has been involved at all stages of the specialist staffing process from conceptual feed engineering through all stages of EPC with the contractor and has followed the majority of projects through to operation and maintenance stages. By doing so, and by placing high quality candidates into oil & gas jobs at all project levels, PE Global has developed a detailed understanding and invaluable experience in each life cycle phase of oil & gas projects.

PE Global has the necessary infrastructure in place to tap into the global talent pool, importing skilled labour from project to project and from country to country; and with an extensive range of value added services for clients and contractors, anyone that deals with PE Global can rest assured that they are dealing with a truly global specialist.

PE International Construction and Infrastructure has built relationships with many leading contractors, developers and consulting engineers throughout the Middle East and Internationally in countries such as UAE, Qatar, Saudi Arabia, Oman, Bahrain, Kuwait, Egypt, Libya, Sudan, Canada, Australia, China, South Africa and many more.

PE International provides people of many different nationalities from the local workforce and from the Ex-Pat community, we provide:

- ▶ Project Directors
- ▶ Project/Construction Managers
- ▶ Commercial Managers
- ▶ Quantity Surveyors
- ▶ Estimating and Tendering
- ▶ Health & Safety Managers/Engineers
- ▶ MEP Engineers
- ▶ Project Engineers
- ▶ Environmental Engineers
- ▶ Structural Engineers
- ▶ Planning Engineers
- ▶ Quality Managers/Engineers
- ▶ Rail Engineers
- ▶ Design Engineers (Structural/Civil/M&E)
- ▶ Architects & Technicians
- ▶ Cad Operators

PE International Construction and Infrastructure specialises in the supply of senior engineering professionals for our global client base. We use a strategy of implementing our technical expertise and large Engineering community to build a brand based on technical knowledge leading to a quality of Service second to none for any multinational client. Our client portfolio is an impressive mix of regional and international contractors, developers, manufacturers and consultancies.

PE Global has been supplying contract and permanent personnel to the Mining, Chemical and Mineral Processing Industries for many years.

PE Global has developed a detailed understanding of the Mining and Chemical Industries. We have an international presence and an extensive knowledge of these industries and can provide tailor made, innovative recruitment solutions.

PE Global focuses upon the recruitment and selection of specialist supervisory, para professionals, trade, skilled and semi-skilled personnel.

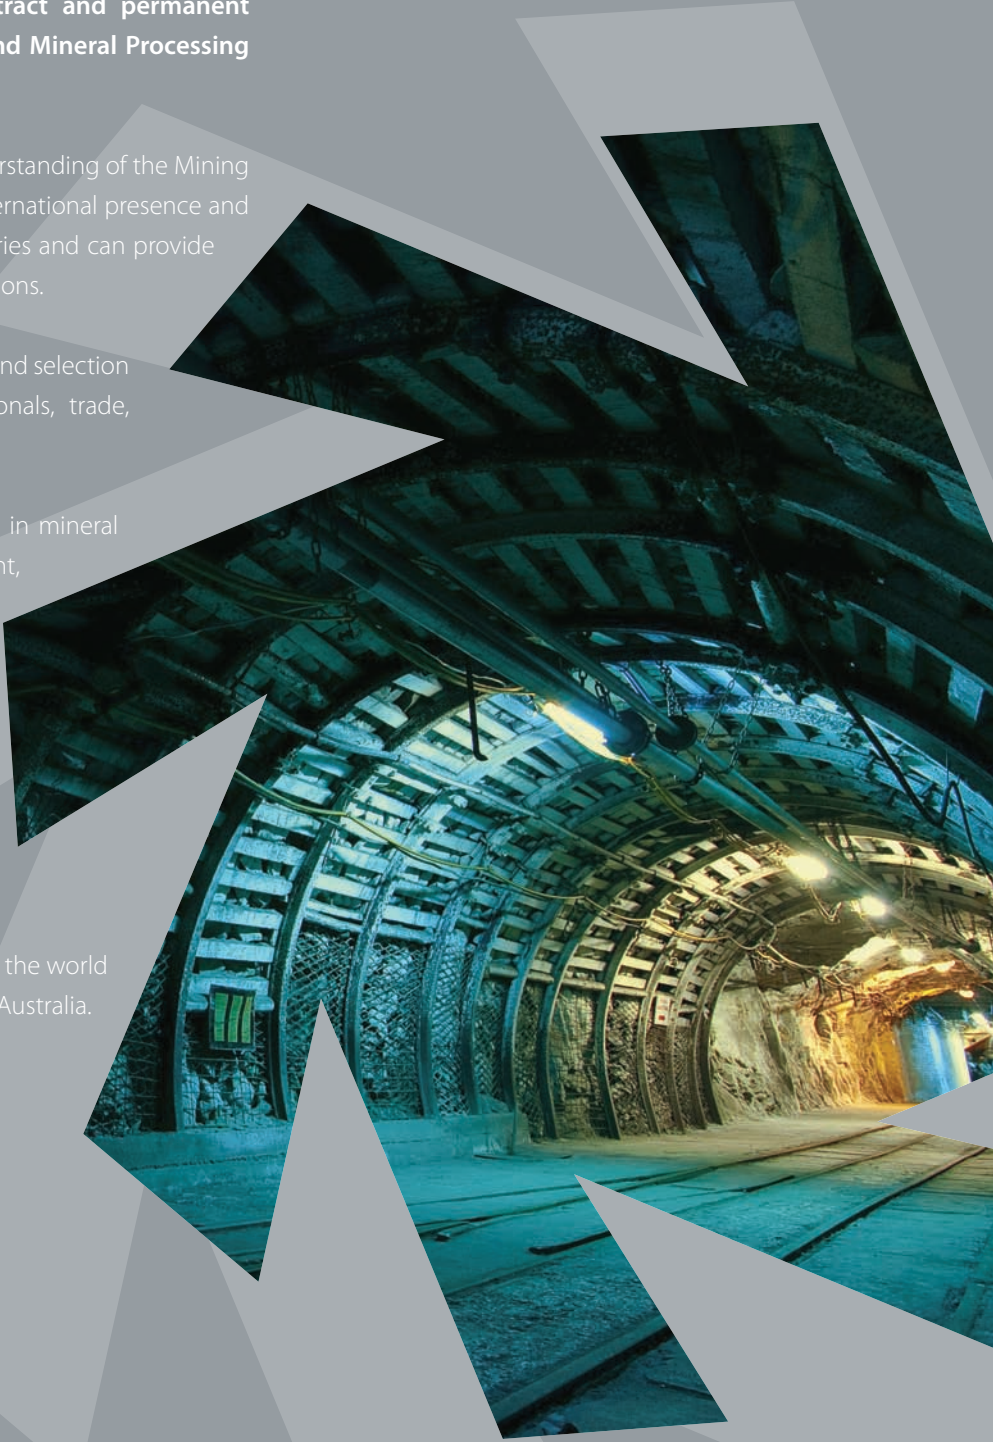

PE Global recruits professionals involved in mineral exploration and project development, mining and mineral processing across a range of commodities; including coal, precious metals, base metals, industrial minerals, gems and diamonds. Candidates include permanent professional recruits or assignees from mid-level management through Board-level appointments.

PE Global supplies people all throughout the world including the UK, Europe, Asia, Africa and Australia.

We can provide candidates from the following skill sets:

- ▶ Supervisory
- ▶ Process and Production
- ▶ Electrical and Mechanical Trades
- ▶ Operations Support
- ▶ Maintenance
- ▶ Open Cut & Underground Mining
- ▶ Mineral Processing
- ▶ Planning and Drawing Office
