About us

Lumus Imaging is a trusted name in private diagnostic imaging, built on three foundational pillars:

- People
- Quality
- Customer Experience

Empowering our people, delivering clinical excellence, and providing a superior experience for every patient.

Lumus Imaging harnesses all of the knowledge and expertise we have gained over the last 30 years and combines it with the empathy and care of our people.

Our team of radiographers, sonographers, nuclear medicine technologists, nurses, centre support staff, as well as our network of independent radiologists make up our 2,000 diagnostic imaging experts and support staff across 150 sites right around the country.

Our Radiologists are supported by our advanced technology, collegiality, case mix, commitment to flexibility and our dedication to education.

We offer:

- Dedicated to offering best in class technology
- Varied flexible work arrangements to support your priorities
- Education and development opportunities
- Sub specialty reporting available
- Clinical excellence and collegiality
- Market leading remuneration

150 sites nationally: Hospital, Community & Medical Centres

Message from the CEO

At Lumus Imaging, we've created an environment where Radiologists can do their best work — with the support, flexibility, and clinical focus that makes a real difference every day.

Lumus Imaging is built around a strong culture of peer collaboration, subspecialty support, and continuous learning. Radiologists have real input into clinical protocols and technology decisions, with access to a wide case mix and cutting-edge imaging equipment.

We understand that work-life balance matters. Our group offers flexible working models, including on-site, remote, and hybrid reporting options. Our scheduling is designed to minimise burnout and maximise productivity, with smart workflow systems that reduce friction and support turnaround times.

Lumus Imaging offers pathways for professional development and leadership. We actively support CPD, subspecialty focus, and clinical research, while also creating opportunities for those interested in mentoring, teaching, or taking on leadership roles.

We're investing in our people, our technology, and our future, and we're looking for Radiologists who want to be part of this journey.

Dr Phil Lucas
CEO, Lumus Imaging

Meet our Clinical Council

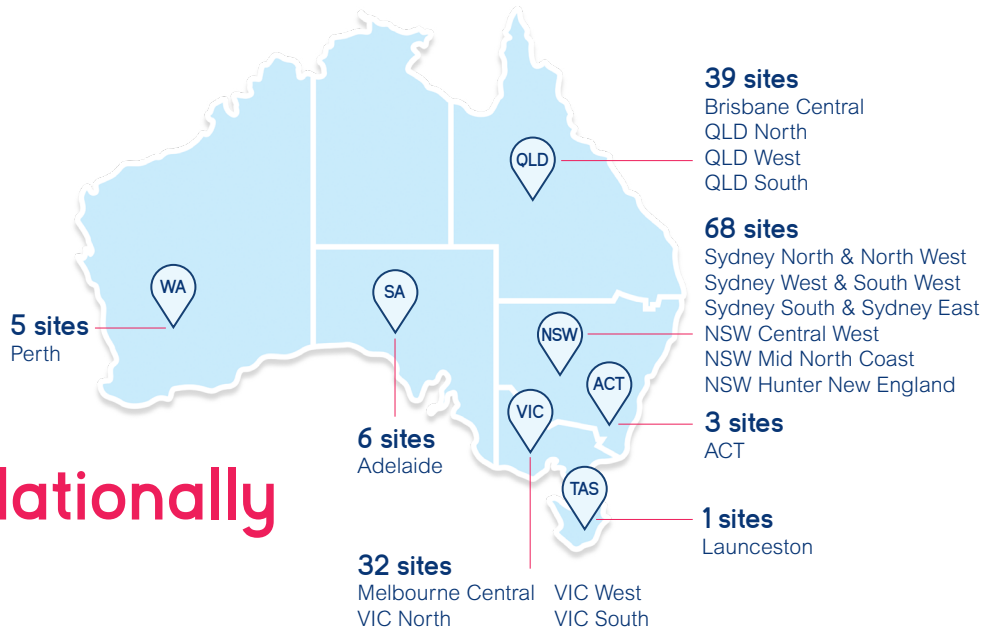

The Imaging Clinical Council is a committee that includes radiologists and senior executives, established to provide clinical and professional direction in radiology and nuclear medicine.

With quarterly meetings, we ensure continuous innovation and excellence in patient care.

The Imaging Clinical Council also assists with the clinical review of safety and quality governance initiatives, and provides input into strategic clinical planning and development.

Lead by Dr Tom Snow,
Clinical Director Imaging.

Equipment & Technology

Lumus Imaging always investing in new equipment and technology.

- **Improved Diagnostic Accuracy:** Modern imaging systems offer higher resolution, faster scan times, and advanced AI tools for better diagnosis.
- **Expanded Capabilities:** New PET-CT or hybrid systems (e.g., PET/MRI) allow early detection of complex diseases (e.g., cancer, Alzheimer's, cardiac conditions).
- **Lower Radiation Doses:** Newer CT machines and PET systems reduce patient radiation exposure, enhancing safety.

Lumus Imaging AI technology is transforming **medical imaging** across the entire diagnostic and clinical workflow. At Lumus Imaging algorithms that can analyze medical images to:

- Detect abnormalities
- Classify diseases
- Quantify changes over time
- Assist with diagnosis and treatment planning
 - Salix (Artyral) CT Scans
 - Blackford's Transpara – Breast SCREENING Volpara for Density
 - SNAC-IQ Thyroid and breast ultrasound
 - CMConnect – PET
 - Annalise – Chest xray / CT Brain and CT Chest including lung nodules.

Education and CPD

The National Imaging Conference is our landmark annual education event.

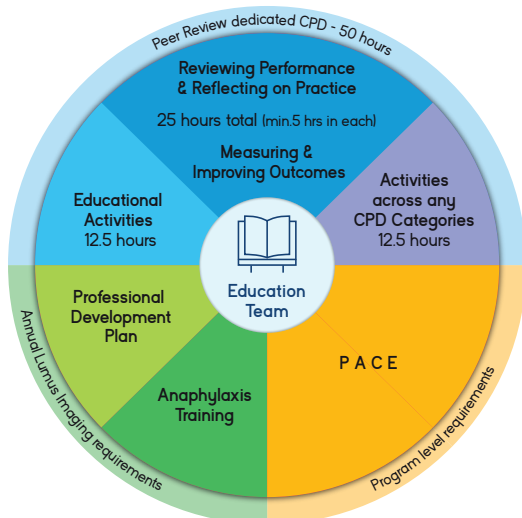

It promises to enrich our Radiologists knowledge and skills by providing a platform so they can be updated on the latest advancements in Radiology, diagnostic techniques, imaging technology and medical equipment. This event also assists our Radiologists in meeting their RANZCR and AHPRA accreditation requirements.

Our National Imaging Conference brings all of our Radiologists together in one collegiate and social environment allowing us to interact and network with other Radiologists as well as our medical equipment suppliers, imaging service providers and technical suppliers. All of this helps us to move toward delivering high-quality patient care.

CPD

- Professional Development Plan
- Clinical and Management Meeting held twice a year May – November
- Annual updates on CPD meeting their RANZCR & AHPRA accreditation requirements.

Annual Reference Guide to 50 hours CPD

Registrar and IMG

Lumus Imaging acknowledges opportunities for education and career development are important to all registrars & IMGs and provides opportunities to support education requirements.

The Lumus Learning Library has access to:

- International Journals
- Digital imaging libraries
- Recorded Medical Imaging lectures.

Subspecialty Tutorials

Lumus Imaging provides ongoing education on OSCE modality training in Pathology, Radiodiagnosis, Abdominal, Neuroradiology / Head and Neck, Thoracic and Cardiovascular, Breast, Obstetrics and Gynaecology

- Examination Preparation – 2 full day sessions per year
- Additional Ad hoc Education Sessions – dependent on clinical requirements.

Supervisors

Lumus Imaging provides all Registrars and IMG with a principal supervisor who is approved by the Medical Board to oversee the supervision of the IMG. Principal supervisors are responsible for ensuring that the IMG is adequately supervised and that any co-supervisors/ temporary supervisors meet the Medical Board's requirements.

Research & Ethics

At Lumus Imaging, we are passionate about advancing medical imaging through cutting-edge research and a steadfast commitment to ethics. Our dedication ensures that every innovation not only enhances patient care but also upholds the highest standards of integrity, safety, and respect. We believe that ethical research is the foundation of meaningful progress in healthcare, significantly improving outcomes for patients across all healthcare settings.

Working at Lumus

As part of Lumus, you will have access to state-of-the-art medical imaging equipment and be supported by a team of highly trained technical staff with access to colleagues through a nationwide RIS/PACS allowing mentoring and collaboration in subspecialist interests.

- Ongoing training and conference leave.
- Competitive salary and benefits
- Flexibility for full-time, part-time and a mixture of on-site and off-site commitments.
- Relocation assistance
- Productivity Bonus
- A National Peer Support Network
- Broad Clinical Exposure

Fellowships

We offer Fellowship programs for Radiologists, International Medical Graduates.

- 6/12 month MSK Fellowships
- 6/12 month Respiratory & Chest
- 6/12 months Women's Imaging & Breast MRI
- 6/12 months Breast
- 6/12 months Emergency Trauma

At Lumus Imaging we are committed to the ongoing training and development of our radiologists. Lumus Imaging offers ongoing training, conference leave, and with the support of our Imaging clinical council we offer clinical and professional direction in radiology.

Fellowship can be 3 days a week so you can work as remunerated radiologist.

The Lumus Learning Library

Lumus Imaging offers our staff access to a comprehensive resource in The Lumus Learning Library offering both technical and clinical knowledge, as well as training and educational materials in imaging modalities—designed to support Radiologists, Registrars and International Medical Graduates (IMGs).

Journals Available

- Radiologic Clinics of North America
- Magnetic Resonance Imaging Clinics of North America
- European Journal of Radiology

Recorded Lectures

Our Video library includes Case studies, Tutorials, MDT & Recorded lectures.

Our resource of recorded lectures covers cross sectional Imaging & modalities.

Online Databases

- StatDx
- Detected X
- Rad Primer

Our partnership with RAB allows us the privilege to continue to help our colleagues in developing nations, extending our resources and investing time and finances in our social responsibility as an industry leader.

Each year, Lumus Imaging hosts a radiology trainee from the Pacific Community for a 2–3 week observership at our teaching sites across the Eastern states. The program focuses on specific educational topics, combining hands-on learning with structured training. The experience concludes with attendance at the National Imaging Conference.

With our responsibilities in education, Lumus Imaging is proud to partner with Radiology Across Borders.
